## ABOUT ME

Since graduating with Masters Degree in Computer Science, my career has spanned over several different roles from Management Accountant, Audio Engineer to the most recent, Stage and Production Manager. Each career path brought new challenges where I had to learn a lot of new concepts, technologies and skills quickly and efficiently. In March 2020 I decided that it was time for a new challenge. Channelling my passion for learning, I set a new, personal goal of becoming a Front-End Web Developer. Due to unfortunate events of the current health crisis and suspension of operations of the company I was previously working for, I have been able to allocate 8-10 hours a day to learn computer programming and build projects, both for my portfolio and for initial clients. Besides the newly gained coding knowledge, which I continue to develop and learn more of each day, I offer a driven and goal oriented mindset, determination in problem solving as well as ample amounts of soft skills, gained from working in multicultural environment in the most recent years.

## RELEVANT EXPERIENCE

### FREELANCE WEB DEVELOPER

JULY 2020 - PRESENT // SZCZECIN, POLAND

- ✦ Analysis of customer requirements
- ✦ Research of possible technologies, tools and platforms to deliver the product
- ✦ Implementation of chosen technologies post client agreement to create responsive websites and web applications
- ✦ Currently working on creating custom web application for e-commerce logistics company and online store for chemicals company based on Shopify platform

### STAGE AND PRODUCTION MANAGER @ ROYAL CARIBBEAN INTERNATIONAL

NOV 2019 - JUNE 2020 // MIAMI, USA

- ✦ Managing team of Theatre Technicians and Technical Stage Staff aboard Ovation Of the Seas Cruise Liner

### ASSISTANT MANAGEMENT ACCOUNTANT @ BOURNE LEISURE LTD.

2006 - 2008 // MINEHEAD, UK

- ✦ Supporting Finance Manager and board of Directors during decision making process by analysing, reporting and presenting financial data

## SOFT SKILLS

In my previous roles I have gained several important skills and abilities, that any company and team of software developers would benefit greatly from. These include:

- ✦ The ability to learn new concepts and technologies quickly and efficiently to then pass that knowledge to the team
- ✦ The ability to creatively solve problems
- ✦ The ability to perform quick and effective research, targeted at solving a problem
- ✦ The ability to analyse and focus on a problem for extended periods of time
- ✦ Conceptual thinking
- ✦ Efficiency in reading and analysing technical documentation
- ✦ Planning daily work and prioritising tasks without supervision
- ✦ Team management and leadership skills
- ✦ High social intelligence allowing to communicate with a vast array of personalities from various backgrounds
- ✦ Ability to explain complicated technical jargon to a base-line level for non technical people.

## TECHNICAL SKILLS

### PROGRAMMING LANGUAGES

JavaScript (ES 6), HTML, CSS

### LIBRARIES & FRAMEWORKS

Materialize, Bootstrap

### TOOLS & PLATFORMS

Git, Firebase, Wordpress, VS Code

### DESIGN & PHOTO EDITING

Photoshop, Lightroom, Adobe XD

## EDUCATION

### UNIVERSITY OF SZCZECIN

2000 - 2006 // SZCZECIN, POLAND

Master's Degree in Computer Science, Information Technology in Management

## CERTIFICATION

### FREECODECAMP.ORG

APRIL - PRESENT 2020

- ✦ Responsive Web Design
- ✦ Javascript Algorithms And Data Structures
- ✦ Front-End Libraries (currently studying)

## PROJECTS

### GLOBEX WEB APPLICATION

**Source code:** <https://github.com/SebastianKut/Parcel-Delivery-WebApp>

**Website URL:** <https://sebastiankut.github.io/Parcel-Delivery-WebApp/>

Web application for e-commerce logistics company, where users can sign up, log in, submit and view their orders. Admin of the website can view orders from all users as well as modify, delete, filter and search them. Utilises User Authentication and Firestore database. Build with: Vanilla JS, HTML, CSS, Materialize and Firebase.

### NOTEPAD WEB APPLICATION

**Source code:** <https://github.com/SebastianKut/Note-pad>

**Website URL:** <https://sebastiankut.github.io/Note-pad/>

Notepad application that utilises local storage, so users can add new notes and edit or delete them. They can also filter through notes using search bar at the top. Build with: Vanilla JS, HTML, CSS.

If you are interested in viewing more of my projects, I encourage you to visit my [Website](#) or [Github Profile](#), where you can find examples of landing pages as well as couple of commercial projects I build for my first client.

## INTERESTS

Playing guitar, music production, photography and learning new programming languages.
